Here is the finished case for the 'Weightless Oak Mount'. It's made of 1/2" oak plywood except for the center 1/4" divider (and the chain) that are not on the plans.

The foam is a cheap camping mat from Wal-Mart (I needed three).

The handle is a home made 1-1/4" brute. There are four 1/4"x20 bolts that go into T-nuts.

Loaded the case is pretty heavy, but luggable and it fits in the truck nicely.
